di Oceanografia e di Geofisica Sperimentale

Advanced Training School on Sustainable Blue Growth in Mediterranean and Black Sea countries

Building capacities and developing skills
in the marine and maritime sectors

4-8 July 2016

Giambiagi Lecture Hall, Adriatico Guest House, the
Abdus Salam International Centre for Theoretical Physics (ICTP),
Via Grignano n. 9, TRIESTE

OGS (National Institute of Oceanography and Applied Geophysics) in collaboration with other partner-institutions is organizing a one-week training school in Trieste for researchers, scientists and managers from the Mediterranean Region and Black sea. The focus of the training school is on strengthening professional skills in the field of oceanography, marine sciences and blue growth.

In the context
of the BLUEMED Initiative
